Technology supplied, installed and kept running.

An indigenous Nigerian information technology company, incorporated in 1997, supplying and deploying the systems organisations depend on — hardware, connectivity, software, cloud, security and the people who keep it working. One accountable supplier, from specification through to support.

CORE CAPABILITIES

What we do

ICT equipment supply

Laptops, desktops, workstations, servers, tablets and rugged field devices, with power protection, racks, displays, printing and consumables — sourced through authorised distribution with warranty intact.

Connectivity & networks

Dedicated internet by fibre, licensed microwave radio and C/Ku-band VSAT; MPLS and IP-VPN; LAN and WAN design; structured cabling; enterprise wireless; SD-WAN; VoIP and unified communications.

Systems integration

Site survey, installation, configuration to an agreed build standard, system testing, commissioning, as-built documentation and formal handover with user orientation.

Software & web

Corporate and government portals, business applications, database design, content management, e-commerce and payment integration, APIs and systems integration.

Cloud & data centre

Cloud readiness assessment, migration and modernisation, hybrid architecture, virtualisation, managed hosting and colocation, backup, disaster recovery and business continuity.

Cybersecurity

Security assessment, perimeter and endpoint protection, identity and access management, network segmentation, monitoring and logging, incident response, policy and awareness training.

AI & automation

Automation opportunity assessment, document and invoice processing, records digitisation and search, workflow automation, enquiry assistants, analytics and data governance.

Managed services

Scheduled preventive maintenance, SLA-backed break-fix, multi-site field service, service desk, spares, warranty coordination, monitoring and asset management.

Consultancy & delivery

IT strategy and architecture, procurement specification and evaluation, technical due diligence, total cost of ownership, project and programme management, training and capacity building.

Current engagement

DNET has delivered connectivity and voice services to an international philanthropic foundation's Abuja country office continuously since 2014 — dedicated internet over our IP/MPLS network by licensed microwave radio and fibre, enterprise voice including E1/PRI with direct inward dialling, managed customer premises equipment, carrier redundancy with automatic failover, and 24×7 support under a service level agreement.

The client's services agreement restricts use of its name in promotional material. Named references are provided directly to procuring entities on request.

Why organisations choose DNET

- **One accountable party.** Specify, source, deliver, install, test, commission, train and maintain — no gap between contractors for a problem to fall into
- **We run networks, not just sell boxes.** Former NCC-licensed ISP with our own AfriNIC IPv4 allocation, autonomous system number and BGP peering
- **National delivery is routine.** Scheduled monthly service across 38 locations in all 36 states and the FCT
- **Continuity.** Twenty-nine years of unbroken trading and audited accounts

TRACK RECORD

Selected experience

World Health Organization, Nigeria	Client from 1999. Award letters for 6 Mbps symmetric fibre internet to the country office and for maintenance of VSAT and office equipment across 36 states and two polio laboratories; routine maintenance agreement covering 38 offices nationwide; sustained equipment supply against competitive RFQ.
John Snow, Incorporated	Master Services Agreements for internet in Abuja and Calabar — fibre with microwave and VSAT backup; video conferencing and VoIP; LAN installation; equipment supply. Certificates of completion issued.
FHI 360	Dedicated internet by fibre and microwave radio across multiple offices; WAN deployment; video conferencing; competitive IT equipment supply.
ECOWAS	Supply and delivery of 200 kVA dry-cell battery systems for institutional power backup.
Gas Aggregation Company of Nigeria	Corporate web design and hosting; domain registration and corporate email portal deployment.
Federal Ministry of Interior	Competitive supply of computing equipment to the Ministerial Tender Board.
Guardian Newspapers Limited	Design, development and hosting of the national newspaper's web platform. Rated Nigeria's best media newspaper website for customer experience by Phillips Consulting.
Joint Admissions & Matriculation Board	Web platform design and development for the national examinations body.

Award letters, master services agreements, client-issued certificates of completion, purchase orders and delivery documentation are provided to procuring entities on request.

Network & carrier credentials

- Internet service provider licence, Nigerian Communications Commission — INT/012/03 (historic)
- AfriNIC membership with DNET's own IPv4 address allocation
- Autonomous system number and BGP peering capability
- Registered route objects in the RIPE database

Carrier partnerships

Carried by **two first-tier providers, Globacom and Main One** — a Master Service Agreement with Main One for submarine cable capacity and dedicated terrestrial fibre from Globacom with BGP peering. If one carrier fails, the other takes the traffic.

Equipment channel

Institutional supply of Dell, HP, Cisco, APC and Panasonic equipment through authorised distribution. Manufacturer authorisation pursued through the named brand's channel where a tender requires it.

Service framework

Faults classified as emergency, major or minor, with distinct diagnostic and repair targets — 30 minutes to diagnosis and 2 hours to repair at emergency level. Availability guaranteed against a stated percentage, measured monthly. Published planned-outage windows and a named escalation path.

SECTORS

Where we work

UN agencies & international NGOs	**Federal ministries, departments & agencies**	**State governments**
Health & health programmes	**Media & publishing**	**Oil, gas & energy**
Financial services & insurance	**Education & professional bodies**	**Corporate enterprise**
